## Remarks

- The load capacities stated are valid for lifting operation only (corresponding with crane classification according to ISO 4301-1, crane group A1).
- Machine is standing on firm, horizontal ground.
- The weight of the lifting device (pulley block, hoist ropes, shackles etc.) must be deducted from the load capacity.
- Additional equipment on boom (e.g. walkways) must be deducted from the load capacity.
- The max. admissible wind speed can be preselected in the LML software and referred to in the load chart.
- Working radii are measured from centre of swing ring and under load.
- The lifting capacities are valid for 360 degrees of swing.
- Calculation of stability under load is based on ISO 4305 Table 1+2+3, tipping angle 4°.
- The steel structures are calculated according to EN 13001-1; EN 13001-2.
- The last digits of the given dimensions are rounded to 0 and 5 and may differ from the actual dimensions.
- Weights may vary depending on the delivered configuration of the machine, filling level of the tanks as well as generally valid tolerances.
- The illustrations in this brochure may include options which are not within the standard scope of supply of the machine.

# Concept and characteristics

---

### High performance

A powerful, efficient and reliable electro-hydraulic drive system combined with a high-performance lithium-ion battery ensures high productivity and allows for several movements to be carried out simultaneously.

### Ground pressure

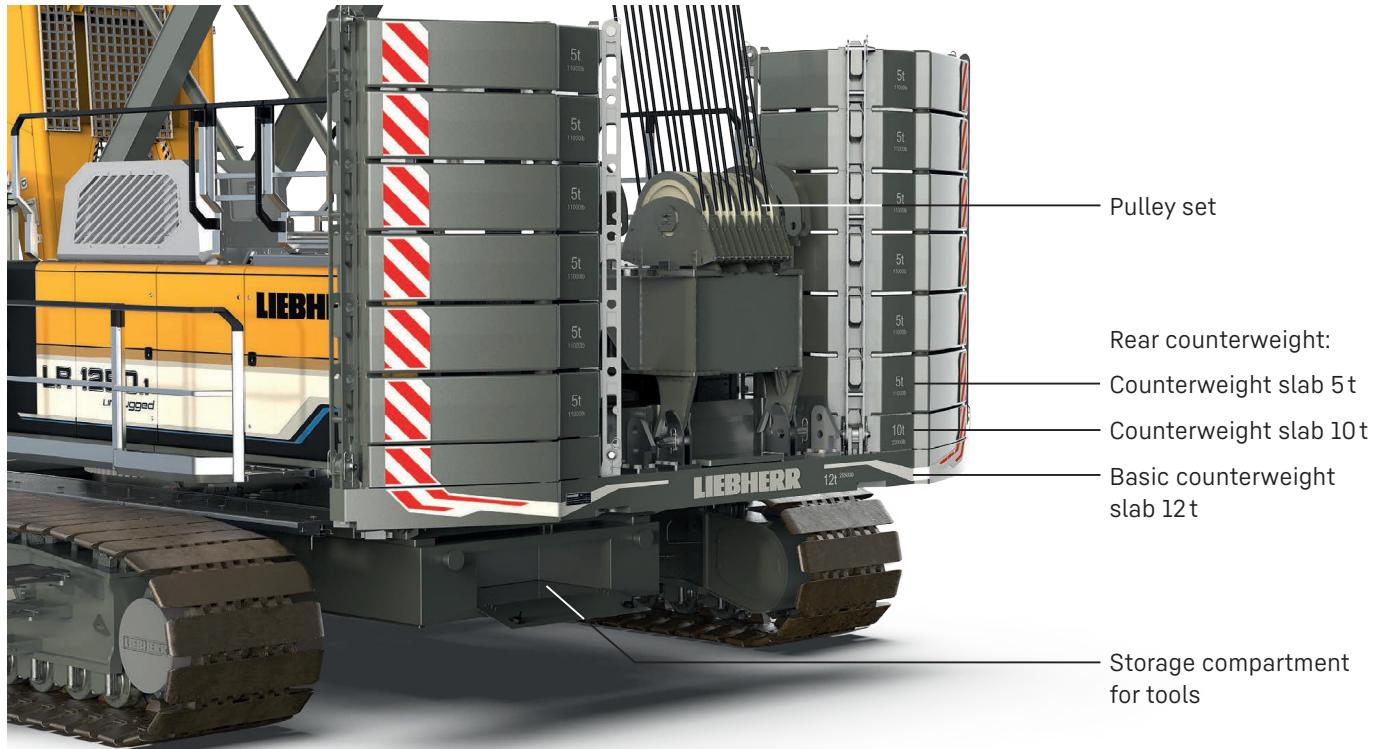

The actual ground pressure is calculated according to the configuration and position of the machine and displayed in the operator's cabin. Using the optional Liebherr Crane Planner the actual ground pressure can already be calculated and displayed in the planning stage.

### Cabin with high comfort

Optimised field of vision combined with enhanced comfort: an orthopaedic operator's seat with heating and cooling functions, as well as precise and ergonomic controls are included.

### Control

Easy and intuitive handling of control, service and machine functions through a large, clear colour monitor. Built for extreme environmental conditions.

#### **Efficient self-assembly system and short assembly times**

The self-assembly system enables safe, independent and quick assembly/disassembly of the crawler side frames, the carbody and rear counterweights, as well as boom elements.

#### **Mobility**

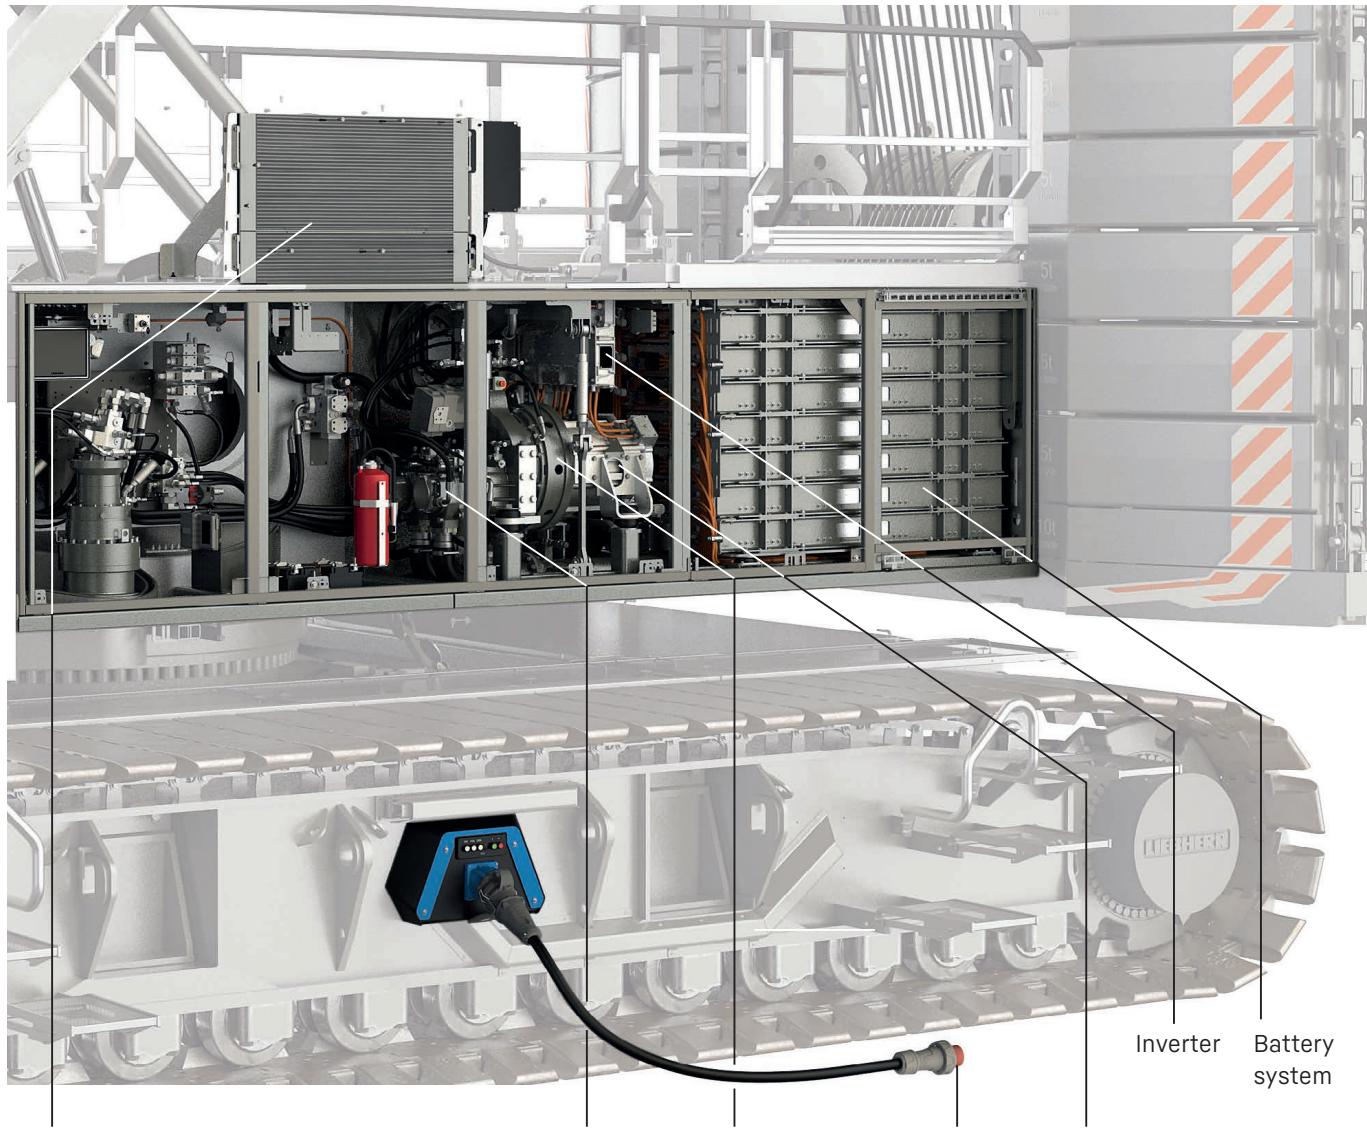

Crane parts are optimized for transportation. The maximum transport width is 3m.

#### **Easy service and low maintenance**

The design ensures easy maintenance and service as well as safe access to the components.

#### **Boom**

A variety of boom systems and configurations allow for optimum operation on the most diverse jobsites.

Control unit

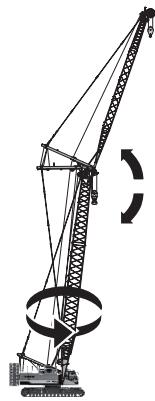

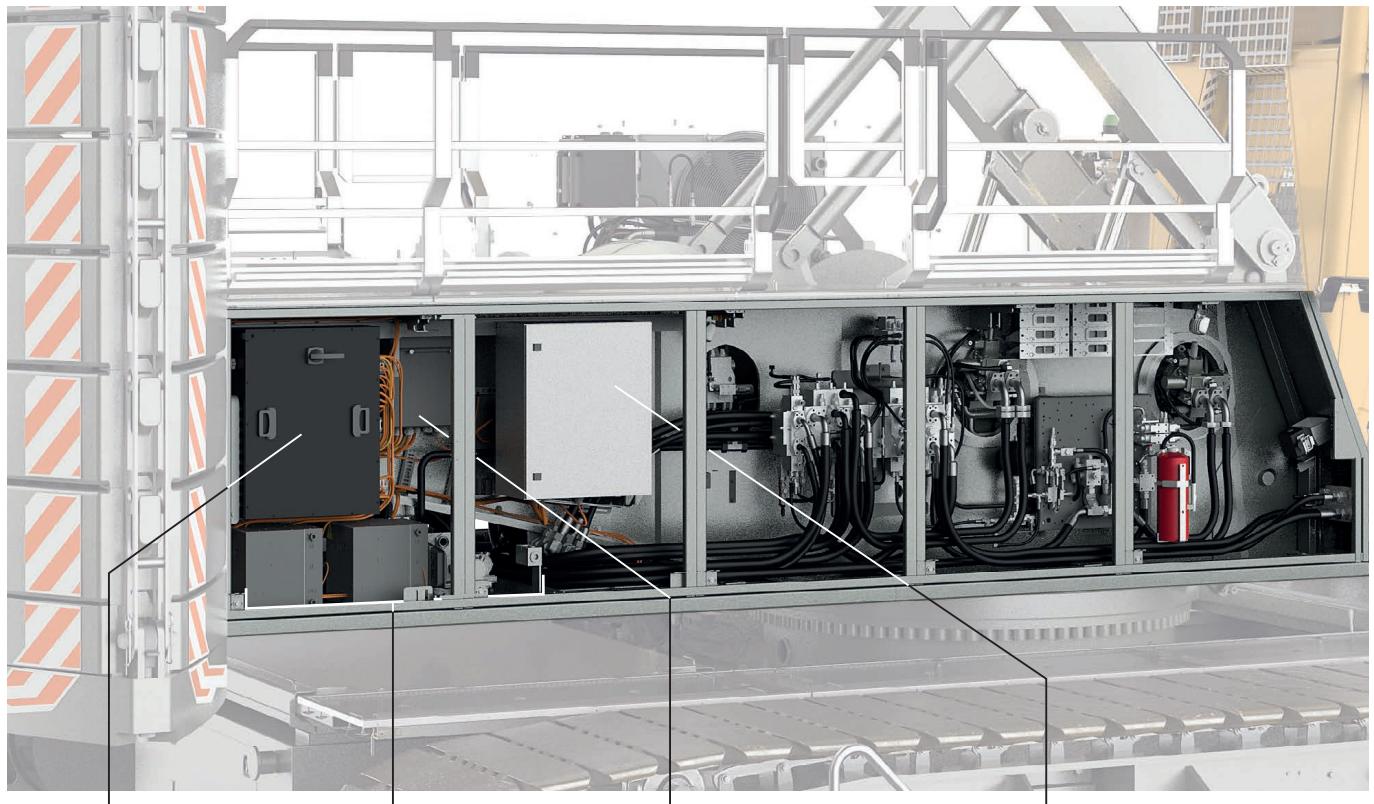

Charging power:

- 20 kW (32A/400V AC)
- 40 kW (63A/400V AC)
- 80 kW (125A/400VAC) Option

#### Performance “plugged in”

The crane's performance in “plugged in” operation is in no way inferior to its diesel-driven performance. The machine can be used without limitations as the battery charges continuously when connected and so delivers sufficient energy at all times.

Switch cabinet 700 V DC  
(Direct Current)

Thermal management  
system

Switch cabinet 400 V AC  
(Alternating Current)

Switch cabinet 24 V LVDU  
(Low Voltage Distribution Unit)

#### **Performance “unplugged”**

The crane’s performance in “unplugged” operation allows for erecting the boom and jib, for travelling a distance of approx. 650 m with full counterweight or for approx. 4 hours of crane operation.
